Experience

UBS | Zurich, CH — Software Engineer (April 2024 – Present)

- Developed & maintained a full stack application for trading & settlement of securities.
- Maintained and supported legacy Credit Suisse applications during UBS merger.
- Built Jenkins pipelines for deployments across DEV, UAT, PROD.

Credit Suisse | Zurich, CH — Software Engineer & Scrum Master (October 2022 – April 2024)

- Handled Scrum Master activities and requirements engineering tasks.
- Developed & maintained full stack application for financial advisory and trading used by 1M+ clients.
- Organized events as a board member of the Career Starter Committee.

Projects

Gridscript — Founder & Sole Engineer (July 2025 – Present)

- Architected and built the full-stack web application Gridscript.io in Next.js from the ground up as the only engineer
- Designed a browser-based data workspace that blends the familiarity of a spreadsheet with the power of scripting (JavaScript & Python) and visualization.
- Developed features including: Excel/CSV import, interactive grid editing (filter, sort, join, split, remove rows/columns) via no-code tools, a full scripting editor for JS/Python, creation of AI/ML models: in JavaScript via Tensorflow.js and in Python via Scikit-learn (together with numpy/pandas) inside pipelines.

Education

Ca' Foscari University, Venice — Bachelor of Computer Science (2019 – 2022)
